

## Personal Details

Name: Kitiya Kongkrailas  
ID card: 1100400320735  
Nationality: Thai  
Email: [ked.cool7@gmail.com](mailto:ked.cool7@gmail.com), [ked\\_cool7@hotmail.com](mailto:ked_cool7@hotmail.com)  
Phone: +668-4656-8685

## Education

Bachelor of Science, Computer Science  
Kasetsart University, Bangkok. GPA 2.18

### - Subjects Studied:

Introduction to Computer, Structured-  
Programming, Object Oriented Programming, Algorithms &  
Data Structure, Digital Computer Logic, Computer  
Organization & Assembly Language, Principles of  
Information System, File Structures, Systems Analysis & Design,  
Fundamentals of Database System, Principles of Programming Languages,  
Fundamentals of Computer Architecture, Web Technology &  
Web Services, Operating System, Simulation & Modeling

Project : Northern Thailand traveling guides website using Ruby on Rail

## Skills

- Experience working for leading finance/banking industry
- Strong background in research and analysis through work experience
- Good team player as well as independently
- Proficient in MVS mainframe, DB2, Crystal Report, SQL, Microsoft office, a bit of .net and JAVA
- My English skills are excellent, both written and verbal
- TOEIC Score: 935

#### Experiences:

- DBA & Programmer intern at Total online solution (April – June 2009)
  - o Assisted on doing oracle queries for the parliament project.
- Cobol Programmer at DST Worldwide Services (April 2009 – September 2012)
  - o Worked with team responsible for converting VSAM to DB2. We converted 1 table per 1 project. The 1<sup>st</sup> project I joined them last about 2 years. During the project cycle break, I helped other team doing ONLINE program and some of CICS. And the last half year at DST I mostly took care of the JCL part. I also did unit testing every single program I coded
- Cobol Programmer Analyst at IBM Solution Delivery (December 2012 – April 2013)
  - o Worked with AMS team (worked for Kasikorn Bank, headquarter) and sub team COC. Mostly we got requirement from any team of Kasikorn Bank, BA then designed an appropriate system/program for them. When they held the meeting, programmer had to join the meeting, see if the system/program was possibly created or not. Once everything came to the conclusion, I started coding. The project I joined creating report handling program for Kbank. I also worked with associates from IBM Singapore, IBM India and Terminos.
- Software Engineer/IT Senior officer for Honda Logistic Asia (April 2013 – Present)
  - o Work with outsource we hired to make the new system for our factory (We call them outsource but actually I am the one who work at their company). The new system is web base system using .net and oracle. Since I have no experience in coding .net before. I am assigned to learn from them. At first I help my team on coordinating between here and Honda, finding input data. So far, I help them on sql code. And I am helping them creating report using crystal report which I have just learnt from them too.
